ELSEVIER

Comput. Methods Appl. Mech. Engrg. 148 (1997) 451–452

Computer methods in applied mechanics and engineering

Contents Volume 148

Volume 148, Nos. 1–2, 15 August 1997

Influence of in-plane restraint on the buckling behaviour of plates under uniform compression, shear and in-plane bending
O.K. Bedair 1

Numerical solution for complete aircraft's subsonic-transonic-supersonic flow at high angles of attack
Q. E, G. Yang and F. Li 11

A finite-strain finite element model for the pseudoelastic behavior of shape memory alloys
A. Masud, M. Panahandeh and F. Aurrichio 23

Existence of approximate solutions and error bounds for viscoelastic fluid flow: Characteristics method
J. Baranger and A. Machmoum 39

Computational plasticity for composite structures based on mathematical homogenization: Theory and practice
J. Fish, K. Shek, M. Pandheeradi and M.S. Shephard 53

Parallel solution techniques in computational structural mechanics
S. Bitzarakis, M. Papadrakakis and A. Kotsopulos 75

A computational model for finite element analysis of the freeze-drying process
W.J. Mascarenhas, H.U. Akay and M.J. Pikal 105

Generating parametrizations of wing geometries using partial differential equations
M.I.G. Bloor and M.J. Wilson 125

Parametric instability of spinning pretwisted beams subjected to spin speed perturbation
T.H. Tan, H.P. Lee and G.S.B. Leng 139

Postbuckling of laminated composite and sandwich plates and shells: On the significance of the fulfillment of static interlayer continuity conditions
L. Librescu, W. Lin, M. DiSciuva, U. Icardi 165

An approximate method for the solution of a three-dimensional free boundary problem arising in hydraulics
A. Kharab 187

A new interface condition in the non-overlapping domain decomposition method for the Maxwell equations
P. Collino, G. Delbue, P. Joly and A. Piacentini 195

Volume 148, Nos. 3–4, 5 September 1997

Implicit time splitting for fourth-order parabolic equations
C.I. Christov, J. Pontes, D. Walgraef and M.G. Velarde 209

A polygonal element approach to random heterogeneous media with rigid ellipses or elliptical voids
J. Zhang and N. Katsube 225

Interpolated boundary conditions in plate bending problems using C^1-curved finite elements
Q. Gao and L. Li 235

Element-free Galerkin method: Convergence of the continuous and discontinuous shape functions
P. Krysl and T. Belytschko 257

A material model for rubber-like polymers exhibiting plastic deformation: computational aspects and a comparison with experimental results
S. Reese and P. Wriggers 279

Simulation of Hot Isostatic Pressing of a powder metal component with an internal core
A. Svoboda, H.-Å. Häggblad and L. Karlsson 299

An efficient formulation of integration algorithms for elastoplastic shell analysis based on layered finite element approach
J. Sorić, U. Montag and W.B. Krätzig 315

A domain-decomposition message-passing approach to transient viscous incompressible flow using explicit time integration
M.A. Christon 329

The application of mathematical programming techniques to the stability analysis of plate/stiffener assemblies
O.K. Bedair 353

Analysis and adaptive modeling of highly heterogeneous elastic structures
J.T. Oden and T.I. Zohdi 367

Unsteady separated turbulent flows computation with wall-laws and $k - \varepsilon$ model
B. Mohammadi and O. Pironneau 393

A hybrid approach to the transient collapse analysis of thin walled frameworks I
R. Vignjevic 407

A hybrid approach to the transient collapse analysis of thin walled frameworks II
R. Vignjevic 423
